IMPORTANT TO CUSTOMERS

NOTICE: No price for any article listed or described herein exceeds the ceiling price for that article as determined under the applicable Maximum Price Regulation issued by the Office of Price Administration. As required by that office, we will, upon request, furnish you with a statement of our maximum prices on any of the commodities listed about which you inquire.

ORDER EARLY. We would suggest that customers send us their orders as soon as possible after receiving this catalog, and thus avoid the rush of the planting season. It frequently happens that some articles are not in stock when orders are received. In such cases we forward such as are ready, and the balance as soon as possible.

STOCK SEED. A large part of our seeds are grown for us on contract by special growers, from our own stock, and in locations best suited for their development. Others are secured from strictly reliable sources, and constant effort is made to secure only the best.

ADDRESS, ETC. Give name of your Post Office, County and State, sign your name plainly; also specify means of conveyance preferred—whether by parcel post, express or freight.

SHIPPING. We deliver free to Express, Railroad or Boat. All goods travel at the buyer's risk, our responsibility ceases when we take the carrier's receipt. If goods are damaged so sign for them and enter claim with the carrier at once.

BAGS AND PACKING. No charge is made for boxes or packing on anything, except Flower Pots, Nursery Stock and Hotbed Sash, and this at cost only. Cloth Bags are charged for at cost and if returned in good condition, charges prepaid, will be credited at price charged.

REMITTANCES. May be made by Express Money Order, P. O. Money Order or Bank Draft; if stamps or cash, send in a Registered Letter. Parties having no account with us, who order goods without remittance, must furnish satisfactory references. Boston preferred.

TERMS ARE NET CASH. All bills on which short credits are allowed are due on the first of the month succeeding the date of the purchase.

All statements of description and analyses on the label or in advertising matter or otherwise of seeds sold or offered for sale by this vender are based on competent tests of a representative sample of the lot sold and delivered and not otherwise. Except as hereinabove expressly provided, the Thomas J. Grey Company gives no warranty, express or implied, as to description, quality, productiveness or any other matter of any seeds, bulbs or plants it sells, and will not be responsible for the crop. If the purchaser does not accept the goods on these terms, they must at once be returned.

GARDENERS' AND SUPERINTENDENTS' SITUATIONS. We have at all times the names of practical gardeners and superintendents in want of situations on our books. If parties desiring such will write us, we shall be glad to put them in communication with men whom we deem suitable. To aid us in making a selection we ask full particulars. We make no charge for this service.

Due to the unsettled market conditions, we cannot guarantee the prices published in this catalog. Each sale will be subject to current prices and also to any Federal or State Sales Tax in effect. Advances will not be made until necessary.

New Introductions

Marigold, Flash

Flash is the Silver Medal winner of the All-America Selections for 1945. The bright combination of colors, from vivid red through bronze with a few yellows, gives an amazing "flash" of color in the garden all summer and fall. Most of the flowers have a base color of tangerine which is overlaid with rich marigold-red. In cool weather this velvety red predominates in the younger flowers, while in hot weather the tangerine prevails.

Plants averaging 18 inches in height are uniform and compact in growth and develop into bushy colorful mounds with finely cut foliage of good color and quality, massed with bright flowers 1¾ inches or more across.

Flash is attractively used for edgings and foreground planting, also to fill beds solidly for massed color effect and to provide a wealth of bloom for low flower arrangements. They also make excellent pot plants. The colors contrast pleasantly with blues and greens, and blend harmoniously with mellow old brick and terra cotta, stained wood and the grays and browns of stone flagging. Pkt. 25c.

Marigold, Real Gold

A new large marigold of the ruffled carnation type, fully double with flowers about 4 inches across of deep rich golden orange color. The strong, erect plants grow about 30 inches tall, and bloom from early summer to frost. This is a Bronze Medal winner in the All-America Selections for 1945. Pkt. 25c.

Golden Cleome

Stately tree-form plants reaching 5 to 6 feet, with showy, airy, golden orange blossoms. Gives a wonderful effect when planted in massed groups. Sow seeds in early spring and they will be in flower from mid-July until frost. Pkt. 20c.

Petunia, Cheerful

Bronze Medal, 1944.

This prize-winner is clear, light pink, with crisp, satiny sheen on salmon-pink petals, with deeper rose veining toward the throat. The color shows up beautifully under artificial light. The color and growing habit is entirely new, plants first grow low, spreading close to the ground, then forming a mound 10 to 12 inches high with a spread of 2 feet; densely compact with no tendency to thin out, fall over or open up at the center. The flowers are 2½ inches across and blooming starts almost as soon as plants are ready to set out in open ground and continues until frozen down in late fall or winter. Since petunias grow well most everywhere and bloom profusely for garden display or cut flower arrangements, we may be happy to add this lovely newcomer to our older petunia favorites. Pkt. 25c.

Marigold, Mammoth Mum

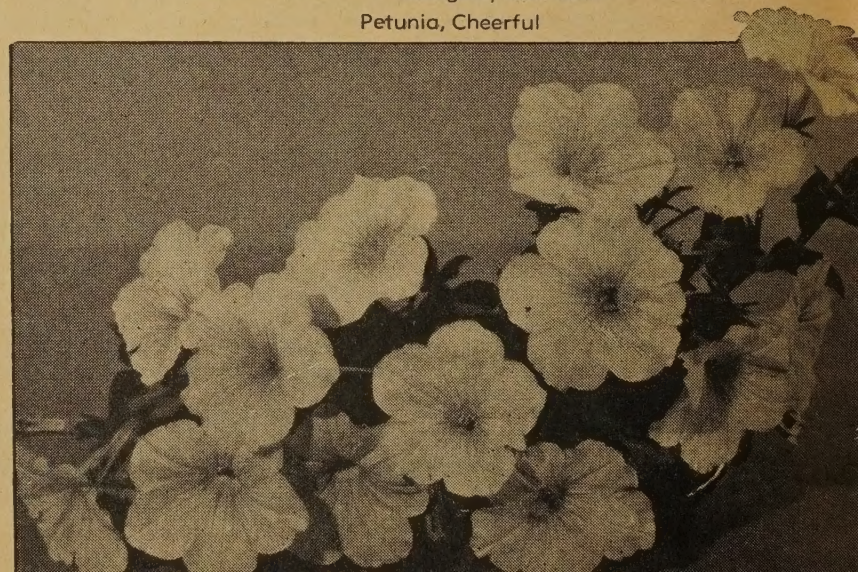

Marigold, Mammoth Mum

Honorable Mention, 1944.

Great fluffy, rich lemon-yellow blooms like the big incurved chrysanthemums give gardeners a chance to have "Mums" for the garden and for cut flowers months before frost comes. Bushy, strong, erect plants reach 3 feet by August, when huge flowers appear, 4 to 5 inches across and 2 inches deep. Frequently a single stalk may be cut for a substantial bouquet. Flowering from August until freezing weather, they make a colorful display in the garden with their rich dark green foliage, and long lasting light yellow flowers. Pkt. 25c.

Larkspur, Brilliant Rose

1192 Giant Imperial, Brilliant Rose. 1945 Introduction. It is a startling, yet warm color, a deep salmon-rose suffused brilliant carmine, a lighter yet more solid and clearer color than Carmine King or Dazzler. The large, round, fully double flowers are closely packed on long tapering spikes. Each plant is neat and compact and averages 4½ feet tall with laterals branching from the base in great profusion. Pkt. 25c.

Verbena, Spitfire

Petunia, All-Double, America

The Baby Salvia

(*Salvia Microphylla*)

A rare little Mexican salvia of charming coral-rose coloring with brown calyx, and buds subtended by white bracts that drop as the buds open. Plants grow uniformly about 16 inches high and have many close, upright stems piled with rich dark green leaves. The combinations of white-bracted buds, carmine-toned flowers and rich emerald foliage is most pleasing. Plants may be started inside for very early blooming, though seeds sown outside where they are to bloom will be in flower by mid-July and continue until frost. It makes a fine pot plant for house or conservatory, blooming through much of the year. Pkt. 25c.

The Baby Salvia

6372 *Salvia Jurisici*. Low rock garden species with feathery emerald foliage and spikes of pretty violet flowers. Pkt. 20c.

Verbena, Spitfire

7445 *Verbena, Spitfire* is the personification of a "Spitfire" in action, radiating its defiance in deep scarlet-rose tone in mammoth 3½-inch flowers. The vigorous plants measure 25 to 30 inches across, carrying 10 to 12 15-inch flower stems, and can be readily used for both bedding and cutting. It is 100 per cent true to color and shows only a trace of an eye in each floret, and is the liveliest color in this group. ⅓ oz. 75c; pkt. 25c.

The Coral Flower

(*Talinum Paniculatum*)

This dainty, easily grown annual has great panicles of little rosy pink blossoms and bright coral, shiny seed capsules like little beads. The many stems grow 30 inches tall from the thick succulent decorative basal foliage bearing the little 5-pointed blossoms in loose clusters. Plant in full sun when the soil gets warm. Pkt. 20c.

Southern Star

(*Oxypetalum Caeruleum*)

Peacock-blue of silver-veiled pastel coloring gives these five-petal, pointed star flowers a most delightful effect when large cyme-clusters of upturned stars are open at once. Plants grow to 15 inches, then arch over as the upturned flowers appear and bloom without pause from June to mid-October. Used as an outdoor annual but is also a splendid pot plant. Pkt. 25c.

True Easter Lily

True Easter Lily

(*Lilium Longiflorum*)

Takesima. Immense trumpets of pure waxy white, delightfully perfumed. May be grown in pots for Easter as florists grow it, or used as an outdoor lily. At Boston it will need some protection in late fall of straw or leaves. Pkt. 25c.

Rosy Wings (*Othake; Polyptris*)

6222 The silvery pink flowers have very double center with outer petals in wing form of the same shade. Leaves are narrow and silvery. It should be sown where it will stand, will grow in almost any kind of soil and blooms from June until October. Pkt. 20c.

Petunia, Colossal Shades of Rose

New All-Double Petunia — All-America Silver Medal Winner for 1946

5520 Colossal Shades of Rose is the first giant All-Double Petunia ever created in America, and the biggest double Petunia ever known, many flowers growing over 5 inches across. All are fully double, varying in form from those with crisply fringed petals to those with beautifully ruffled petals. This variation in flower form adds interest to a planting as does the difference in color, which ranges from salmony pink through rose-pink to deep, rich rosy mauve—a most attractive blending of rose shades. Plants are strong growing, 20 inches high, spreading as much as 3 feet across and bearing their immense all-double blooms in the greatest profusion. Valuable for beds, borders, window boxes and cutting. Pkt. \$1.00.

SUBURBAN BOSTON MIXTURE OF ANNUAL FLOWER SEEDS

An Interesting Mixture of Many Annuals

This splendid mixture of practically all the annuals in our catalog, except Sweet Peas and Nasturtiums, gives a wonderful display of color and variety to the garden from early summer to frost. For those whose gardening time is very limited, it provides an easy way to have plenty of flowers for home decoration as well as a gay border or bed outside. Sow in a well-enriched sunny bed about May 1st, pulverizing and raking the top soil smooth and fine, then broadcast the seeds and rake in lightly. If the soil is dry, water well with a very fine spray so not to dislodge the fine seeds. Many varieties will show up inside a week and soon the bed will be full of husky growing flower plants. Weeding and thinning out in case of over-crowding is all the care necessary, a good deep soaking with water once a week in dry weather is more beneficial than daily light sprinkling. Pkt. 25c; oz. 40c; $\frac{1}{4}$ lb. \$1.25; lb. \$4.00.

Culture: Sow seed as soon as the ground can be worked in the spring. Dig a trench about a foot wide and deep, and fill in with 6 inches of well-rotted stable manure; tread down firmly and replace the good garden soil. Draw a single straight line in the middle of the prepared surface, about 3/4 inch deep; sow seed at even distances of about 3 inches, and cover. When the plants grow about 3 or 4 inches high, thin out to 6 inches from each other. As soon as the vines reach a height of about 8 inches, proper supports should be provided. Supports can be wire netting, branches, etc. The Sweet Pea is a moisture-loving plant, and by the month of May the plants will require water. When watering is required, soak the trenches thoroughly. Dress with peat moss or old stable manure. The seed may be soaked in water for a day.

Our Glads are Free from Thrip!

Due, no doubt, to scientific treatment of planting stock for the past 8 years our Gladioli have always been free from thrip. As an added precaution and to be sure that bulbs supplied by us are absolutely free from this pest, we will also scientifically treat our bulbs again before shipment is made to our customers.

Inasmuch as thrip lives in the soil, as well as on the bulbs in storage, through the winter, it is imperative that our bulbs be planted on soil where Gladioli were not grown last year and not close to other Gladioli from other sources.

If you have other bulbs they should be treated before planting. Soak the bulbs for 6 hours in a solution of Lysol, using 4 teaspoonfuls to each gallon of water.
